ABOUT ME

Computer Science student with a focus on cybersecurity and secure system design. Hackathon winner and co-founder of a full-stack security project. Experienced in building scalable applications and solving real-world problems.

WORK EXPERIENCE

Co-founder & Full-Stack Developer | Jadaathon Incubator Feb 2026 - Present

- Winner of Jadaathon Hackathon and selected for incubation program
- Leading the development of a full-stack security-focused application (Waqaa)
- Designed scalable system architecture to support real-world deployment
- Collaborated with team members to build and improve system functionality

Cybersecurity Virtual Experience | PwC (Forage) Mar 2026

- Completed a virtual cybersecurity consulting experience
- Identified security risks and proposed solutions based on real-world scenarios

PROJECTS

Waqaa – Secure Authentication System (Full-Stack)

- Developed a full-stack security application to improve authentication and reduce fraud risks
- Built front-end and back-end components to support secure workflows

Waqaa Bank – Secure Banking Simulation Platform (Full-Stack)

- Developed a full-stack banking simulation platform with integrated security features
- Designed authentication workflows using trusted device concepts
- Built front-end and back-end components to simulate secure user transactions

Skin Disease Detection (Machine Learning)

- Built a machine learning system for disease detection
- Compared CNN and EfficientNet models
- Improved performance through model optimization

Restaurant Reservation System

- Developed a web application for managing reservations
- Built using HTML, CSS, and JavaScript

SKILLS

Technical: Python, Java, C++,HTML, Flutter | Cybersecurity: Secure System Design, Authentication Concepts | Other: Problem Solving, Teamwork

EDUCATION

Bachelor of Science | Qassim University 2026

GPA: 4.43 / 5.00

CERTIFICATIONS

IBM Generative AI

Founderz AI Skills 4 Women

SATR Java Programming

LANGUAGES

عربي | ENGLISH
